

Work experience report

Mrs. Chen Yang,
born on 15. Januar 1999 in Zhejiang,

Mrs. Yang worked from 1 April 2023 to 30 September 2023 as an intern in the Bank's GRM-RC Cluster Valuations Liquidity- & Market Risk department. As part of her work placement Mrs. Yang was entrusted with the following duties:

- Python Regression Test: Development of a GUI for an existing Python application to increase usability including the referring documentation. Python language programming was performed using the Visual Studio Code development environment and the Git source code management system.
- Linux Shell Script: Development of a shell script to combine the daily log files of a Tomcat server into monthly zip archives and then convert them into an annual archive.
- Create a Python notebook to automate SQL-based analysis in credit line modeling.
- Processing of own Jira tickets related to the tasks above within agile formats in a 25-member team using Kanban.

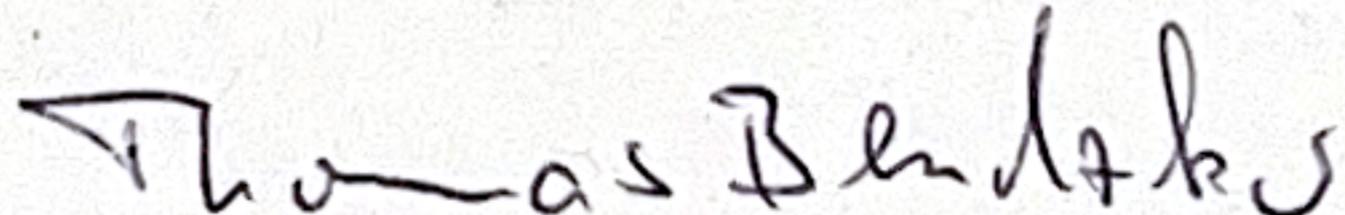

During her work placement, Mrs. Yang consistently exhibited a high level of commitment and motivation. Thanks to her strong interest in the job's specific topics and her above-average abilities, she quickly acquired outstanding practical knowledge.

Mrs. Yang was a conscientious and independent trainee. She consistently performed the tasks assigned to her promptly, and her co-workers always appreciated her reliable way of working and helpful cooperation.

We were consistently satisfied with her performance in terms of its quality and quantity. Her behaviour towards customers, managers and co-workers was flawless at all times.

Today, Mrs. Yang concludes her work placement at the Bank as agreed. We thank her for her consistently good work and wish her further success in both her professional and private life.

Frankfurt am Main, 30. September 2023
